

Emissions Data Assurance Service (EDAS)

Delivering Cloud-based Emissions Data Monitoring

Emission Data Assurance Service (EDAS) a secure cloud-based emissions data monitoring system that provides 24/7 monitoring of the health of your WebDAS2K Data Acquisition System (DAS) and real time backup of your emissions data. Get peace of mind from knowing that our team of experts are virtually eliminating risk associated with downtime and out of compliance incidents.

Problem

Any number of hardware and software errors can create a non-compliance situation. At best adding downtime and at worst drawing the ire of the regulators. The severity of these situations depends on how quickly they can be detected and resolved.

The challenge is these problems can occur in a multitude of unpredictable ways at any time of the day. Often, they will persist until randomly checked on by a technician. Proactive monitoring for situations like these is desirable but relying on humans to do it is time intensive.

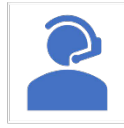

Solution

While proactive monitoring was previously too laborious to offer at scale, new technologies like the Internet-of-Things (IoT) and the cloud can now enable our team to continuously monitor your sites: automatically detecting and addressing issues as soon as they happen, and before they create a non-compliance situation.

In addition, cloud storage enables us to maintain a secure, off-site backup of your data to ensure you don't lose data in the event of a catastrophe

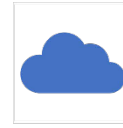

CORE CAPABILITIES

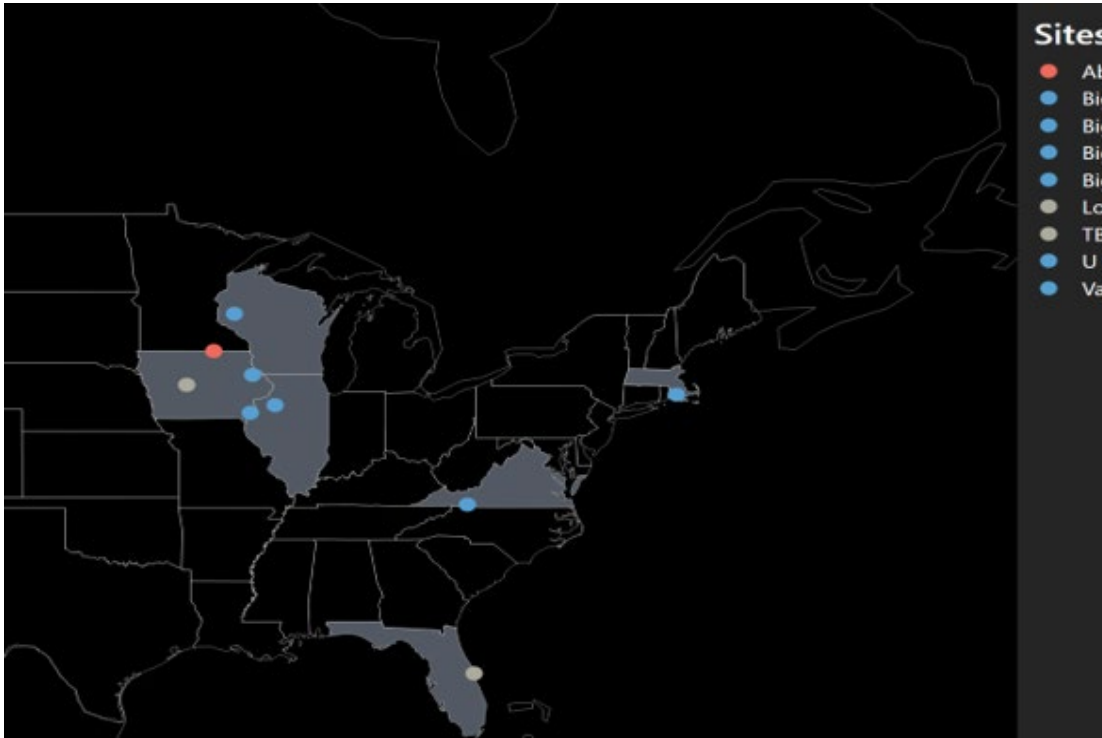

24/7 Proactive Monitoring and support of your system

Check in on the health of all your sites from anywhere in the world

Never worry about losing a quarter of data with offsite cloud backups

WHAT THIS LOOKS LIKE FOR YOUR TEAM

-  Deploying this solution requires no additional work from your team. Just opt in and our team can begin proactively monitoring your DAS.
-  01 Opt into Trace IOT
-  02 Our system begins 24/7 monitoring of your site
-  03 If anything goes wrong, we know instantly
-  04 We'll immediately alert your team and support you through a resolution
